

## Pixel Series Gets Smarter

In 2007, Anutone introduced large-format micro-perfed gypsum board in India for the first time. Till then perforated gypsum board in India meant 600x600 tiles and crude large-size holes.

### Pixel Taper revolutionised the market and the industry for acoustical ceilings

- Large-format of 1200x2400mm size which meant less joints
- Tapered long edges which gave the seamless smooth continuous look
- Micro square perforations of just 3x3mm precisely die-cut on CNC machines
- Possibilities of curved ceiling (as shown in pic above) and blank out some perfs for patterns

Every board consistently identical and aesthetics always a visual delight ... the first time and every time.

For 2016, Anutone springs a twin surprise that will cheer both the contractor and the client.

### ONE - Pixel Taper

Pixel Taper - the large-format board - now in 900kgs/m<sup>3</sup> (12.5mm thick) base board density at ex-warehouse value of Rs. 698/m<sup>2</sup> plus CST/VAT. Yes! Much higher density and lower price makes it most value-for-money in its 10th year!

### TWO - Pixel Square

Pixel Square - the grid tile - now in a value-engineered 9mm thickness with surface vinyl lamination at ex-warehouse value of Rs. 395/m<sup>2</sup> plus CST/VAT. No painting needed. Ready-to-use from carton!

### Pixel Square highlights

- Size - 595x595x9mm
- Edge - Square for Skelet T15/T24 frame
- Surface front - white vinyl laminated
- Surface rear - white acoustical fleece
- Perforation - Square 3x3mm at 8.33 pitch
- Light Reflectivity - 85%
