Segment - **Banking|Finance**

Installer - Creative Solutions

Products - Soak Cord, Tufbloc

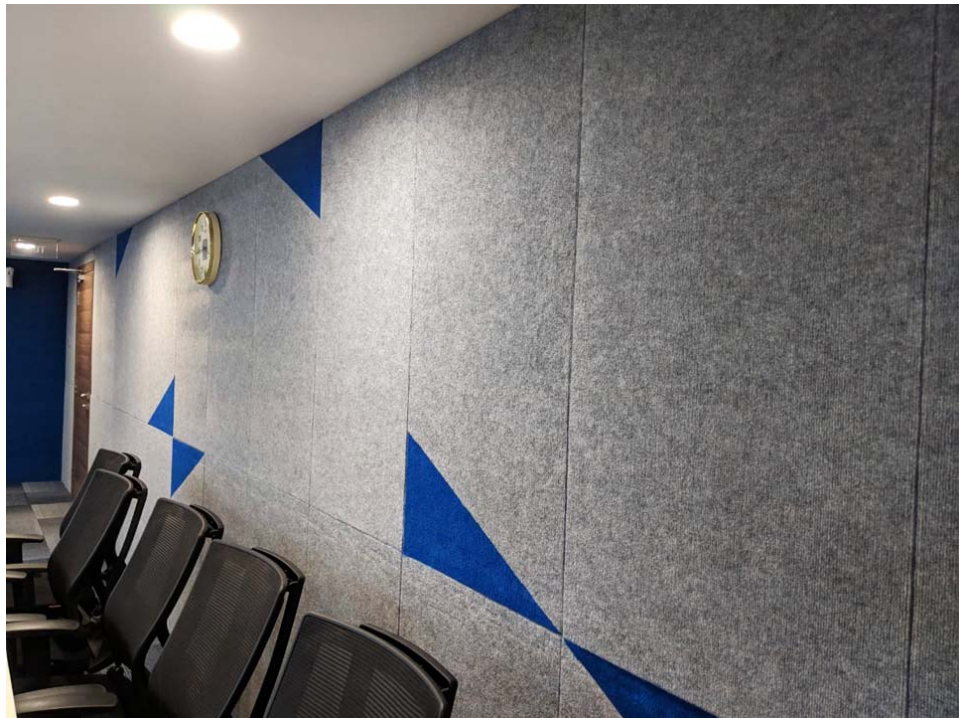

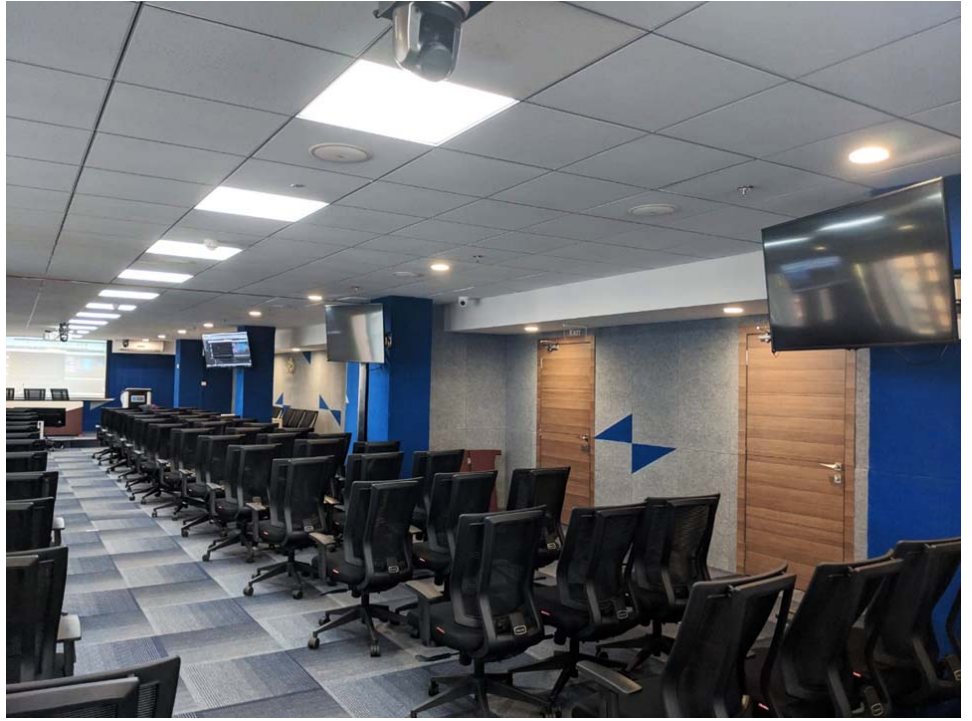

Kolkata's State Bank of India offices have become a huge fan of acoustical wall solutions with Soak Cord panels by Anutone.

Further the Soak Cord panels are inspired by yet another invention of Anutone, the Soak Cord Triangle, executed insitu by Creative Solutions.

This theme has been carried forward not only on the walls but also on the movable partitions which perhaps is for the very first time.

Meanwhile Tufbloc seamless finish does justice to the ceiling bulkheads at perimeters.

Thus Anutone provides a 360 degrees approach to acoustics.

A dome ceiling provides challenges that are best met with Anutone's Stretch SLS the only known acoustical solution in stretched fabric systems (rest may be vinyl with perforations for sound absorption).

The fabric ceiling contrasts very well with Slats Surco wooden acoustical wall panelling. All with Strand and SynthPF as an acoustical infill for performance enhancement. Once more the entire system engineering being testimony to the total acoustical solutions capability of Team Anutone!
