Shapes 2020

Acoustical clouds as Anutone Shapes for dynamism

www.anutone.com

Anutone Heritage

Since 1966, for 50+ years, Anutone has been the thought leader in acoustical panels. Starting with the wood wool board industry in India to architectural acoustics in the 1990s, Anutone has revolutionised and professionalised these verticals.

Anutone Innovation

Anutone's strong emphasis on research and development means pioneering new products and concepts in architectural acoustics many for the first time in India. This augurs well for designers giving them many more viable options conforming to current international trends. A prime example is acoustical clouds as Shapes.

Anutone Resources

An all-India network of own marketing representatives (every major state capital is covered!), dealers and authorised applicators ensures hassle-free pre-sales to post-sales service assistance.

Anutone Standards

Anutone zealously conforms to certification standards and building codes. All products are lab-certified as are Anutone's processes for management, environment and health|safety.

Anutone Green

Most products are made partly from recycled materials and are recyclable. Anutone's manufacturing is largely energy saving. Products are supplied to sites with minimal wastages or emissions.

Anutone Shapes

Anutone has the widest range of acoustical clouds as Shapes in India from smooth Nubby textures in Soft to the classic Strand fibres in Ekcel and the core-pigmented Slim fabric-feel in Synth divisions.

As is well-known, acoustical clouds are best possible in the above fibre-based acoustical panels and not in solid-based perforated acoustical panels like gypsum, metal and wood.

Here are some highlighting features:

- Open plenum ceilings now made more dynamic with Shapes
- You name it we shape it. Some suggested shapes below and overleaf
- Natural acoustics goes truly designer with islands in the sky
- Dual surfaces available for sound absorption. Double efficiency
- Cluster choices for different pattern options. Technical support provided
- Contrast plenum & uplighting suggested for dramatic effects
- Fast and easy to install with supplied accessories

Subtex Shapes

- Glassfibre-based Subtex Nubby
- Brilliant white for high light reflectance
- Fully encapsulated for hygiene & safety
- Now in a wide range of colour options too

Mat Shapes

- Microfibre-based Mat Colour now in Shapes
- Sway-resistant due to natural weight
- Impact resistant due to rigid construction

Strand Shapes

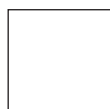

- Woodfibre-based Strand Colour now in Shapes
- Sway-resistant due to natural weight
- Impact resistant due to rigid construction

Slim Shapes

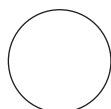

- Polyfibre-based Slim now laser-cut in Shapes
- Lightweight and easy to rig in any situation
