# Salon Colours

Thanks to its elegance and warmth, wood is a basic element of interior design and offers many useful functional characteristics for modern buildings. Special engineering for Acoustics and Fire Resistance (5-test true FR not 1-test Flame Resistance) by Anutone makes it the perfect product for ceiling and panelling with a very attractive appearance.

Salon range of acoustical panels from Anutone offer brilliant aesthetic options with guaranteed functional performance. It is a complete family of products with surface patterns, edge detailing and matching accessories to meet the needs of any architectural space - auditoria, classrooms, offices, hotels, restaurants, worship spaces, studios and home theatres.

Engineered solutions for the creativity of the designer make Anutone's Salon products easy to install and brilliant in their performance with stunning visuals to match. These visual variants enable you to make the right choice.

*\*This Slats swatch card is a sampler for illustrative purposes only. Actual acoustical panel surface and shades will vary from paper print and digital screens. Submitted samples and mock-ups may also not match the actuals. Veneer shades will always inevitably vary, even in the same batch, due to natural extraction of real wood. Melamine shades are likely to vary from batch to batch due to limitations in rendering technology. Wooden panel specifications and colours are subject to change without prior notice due to continuous improvement programs.*
